Britain's greatest furniture designers

Makers' Eye is an exciting new website where interior designers can view and buy superb furniture by 50 of the greatest designer craftsmen in Britain.

Makers' Eye offers visitors the chance to peruse a huge range of beautifully designed, handmade furniture that will last a lifetime. The website contains iconic pieces from a selection of handpicked makers, whose work spans the spectrum of contemporary design. From straight forward yet stunning designs to radical, functional artwork, there is a style to suit everyone's taste.

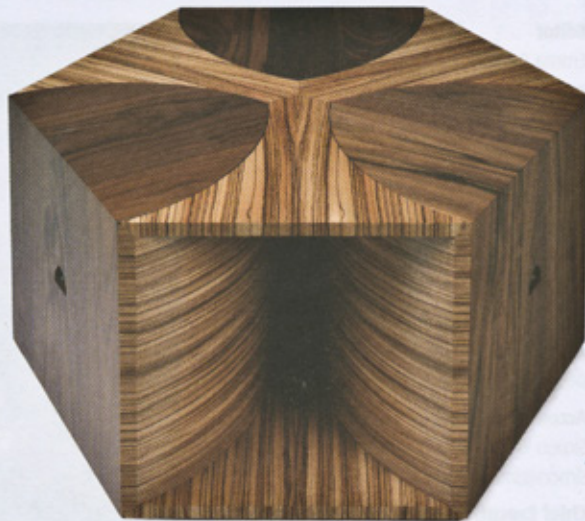

Many of their makers have been awarded the prestigious Bespoke Guild Mark for their work. Indeed, some Makers' Eye members, including Wales & Wales, David Colwell and Freddie Baier, are also represented in the V&A permanent collection as is John Makepeace, whose work is currently shown in the V&A's 'Power of Making' exhibition.

Makers' Eye co-founders Tony Portus and Ross Fenn are both well established in the world of handmade furniture, with over five decades of experience between them.

Tony explains why they created Makers' Eye: "Ross and I wanted to bridge the gap between the UK's enormously talented furniture makers and people looking for the

perfect piece to complete their home or office.

"The broad spectrum of design represented on the site means there is something for everyone. Every piece on the website is unique and finished to an exceptional standard and for those looking for that extra special piece; the Makers' Eye members also design and make to commission."
