

# Radium III

DESK: Ref. 1809

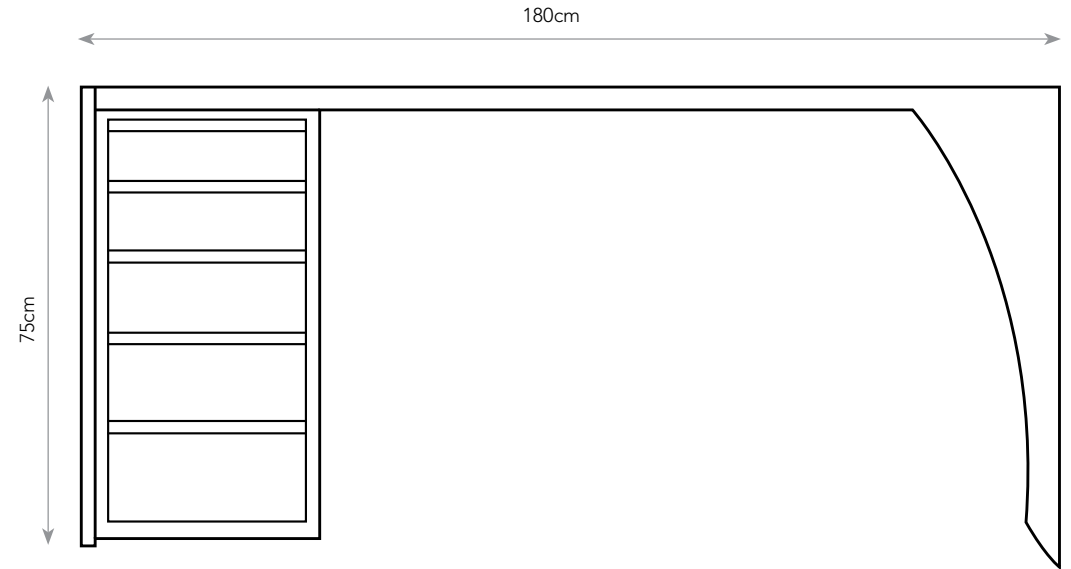

The asymmetrical *Radium III* desk is a limited-edition of 5, and can be made in a wide combination of timbers. This piece utilises our own in-house Murano veneers, stack laminating and carving techniques.

The desk has a beautiful leather top with a gently curving front and back edge. This desk also accommodates five drawers with brass detailing, and contains an integrated power source hidden within the leg.

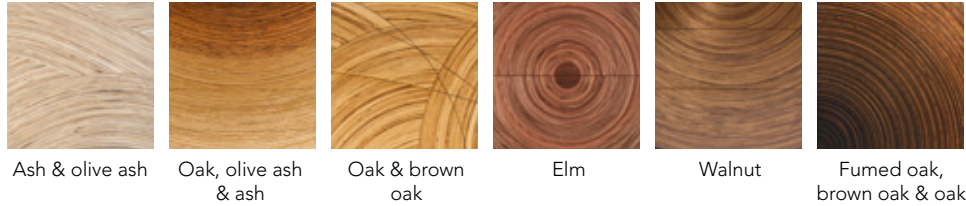

There are many timber combinations to choose from when considering our Murano veneers, with additional options for leather and metal detailing that can be customised. The drawers and power source options can all be tailored to suit your specific requirements within the realms of the design.

Please get in touch to discuss the many options available.
