

# Ripples

CHEST OF DRAWERS: Ref. 1211

The *Ripples* chest of drawers is a limited-edition of 5, and won the bespoke furniture category at the Wood Awards.

This piece utilises our rippled forms, with the ripple starting from one corner and flowing across the surface to envelop the piece.

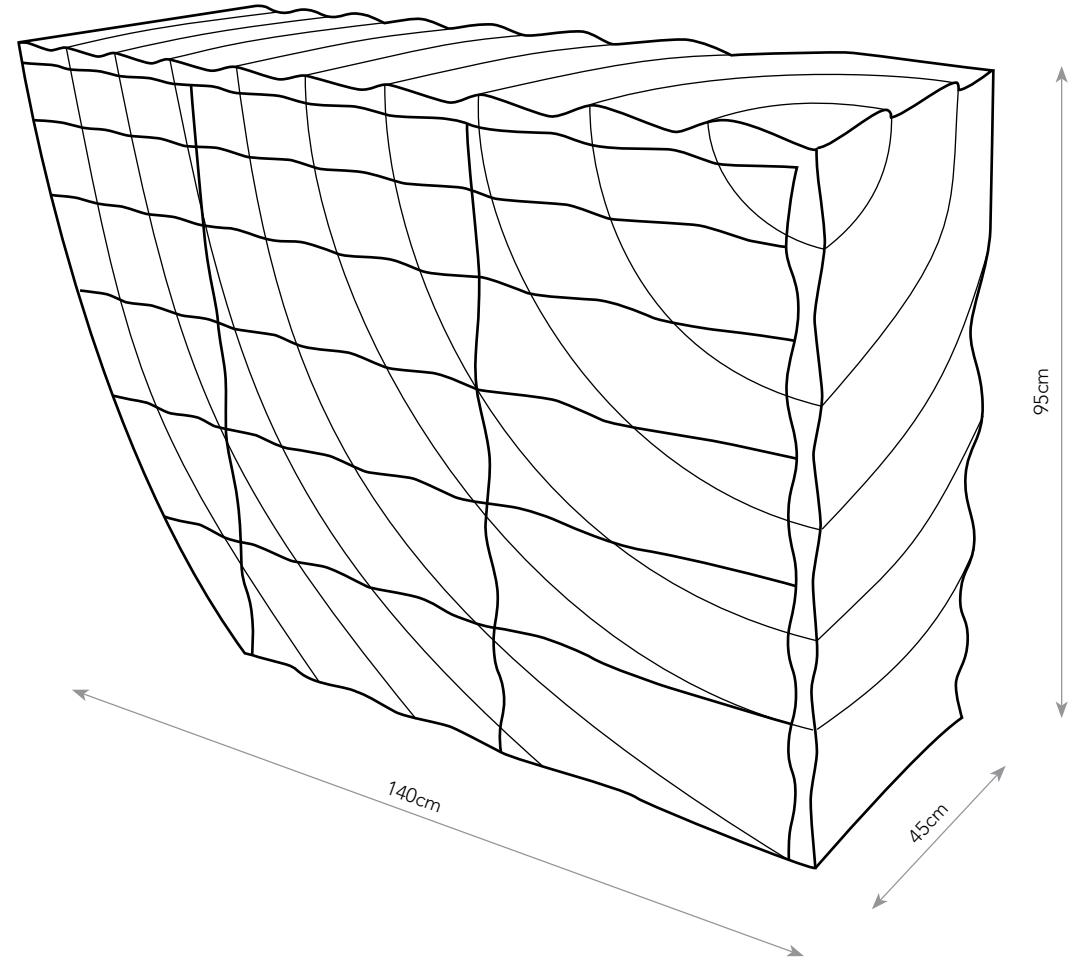

The design can be tailored to suit your specific requirements within the realms of the design i.e. fewer drawers, drawer compartments or cupboard doors.

Our rippled forms are produced in-house, and made using a unique technique that has been developed and perfected by Edward Johnson.

Originally inspired by the action of a stone dropping into water. Our rippled concept can be applied to nearly any piece of furniture with any desired function, in almost any wood.

Please get in touch to discuss the many options available.
