

Clover

COFFEE TABLE: Ref. 1525

The *Clover* coffee table is a limited-edition of 10, it has a glass top and the base can be made in a wide range of timbers.

Each twisted section of timber is exquisitely intertwined in a complex design that appears, at first glance, to baffle the mind.

Our Freeform concept can be applied to a variety of furniture types from hall tables to dining tables and chairs.

Our Freeform technique pushes laminating to its limits. The sweeping curved elements used in the construction are made from one continuous length of timber, using various moulding techniques to shape and manipulate the material. Each curved element is then finished by hand using various spokeshaves.

Please get in touch to discuss the many options available.
